BRAND BOOK 2024

Marble is the heart of the Un'common brand

When we look at marble, we see at least 2 stories
- the one created by man, who extracted and
processed the stone, making it functional; and
the other one - completely unknown, which for
hundreds or thousands of years has led to the
creation of this extraordinary material.

un'common

Contemporary Furniture made in Poland

Un'common is a Polish furniture brand and manufacturer. We design and produce furniture from the finest components such as marble, steel and wood. Although we use cutting edge technology in the design stage, our products are hand made applying traditional methods which enhance the timeless beauty hidden in natural materials.

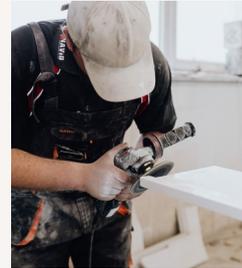

Founded in 2016 in Łódź, city with huge industrial heritage. The inspirations come from our surroundings and living environment. All collections have been created by Gosia Korycka who is a Creative Director of the brand. Every day we carefully observe the world wanting to enrich it with beautiful, functional and timeless objects. It is really fascinating to see everyday objects become quiet and beautiful companions in our life.

Un'common Collections

Basic collection

Natural, durable, unique... a little bit of the cool breeze of nature in your everyday life. These are the reasons why we chose marble as the core material for the BASIC collection and also for all other Un'common products. We combine the classic look of the Carrara marble and the timeless appeal of Nero Marquina with minimalist frames to create

Edge collection

The marble tops of our furniture will have raw, slightly rough edges and that is where the name of the EDGE collection is derived from. We change the way of thinking about stone as a material with an impeccable shine, finished with a classic bevel. Unpolished edges remind us of the true, natural origin of the stone.

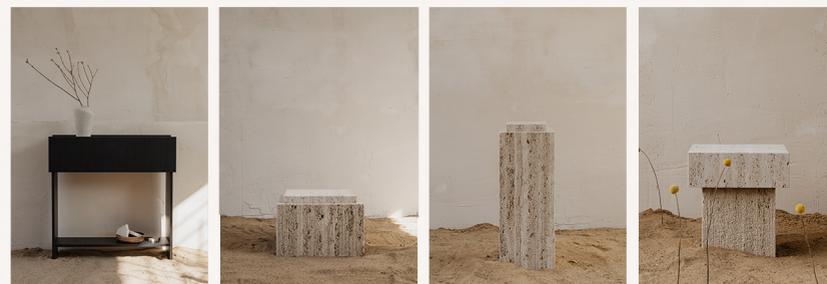

New series - LINEE

The Linee series is furniture with a clean and monolithic form that emphasizes the beauty of its materials. The unique, striated finish of natural travertine, matte quartzite and oak veneer exudes warmth and elegance but also makes the furniture even more *uncommon*.
